MINI MAG BOLTED ARM OPTION

Installation Instructions

The Bolted Arm Option is an alternative to the traditional welded arm that is easier to handle and install without a compromise in strength. The Bolted Arm Option includes the following..

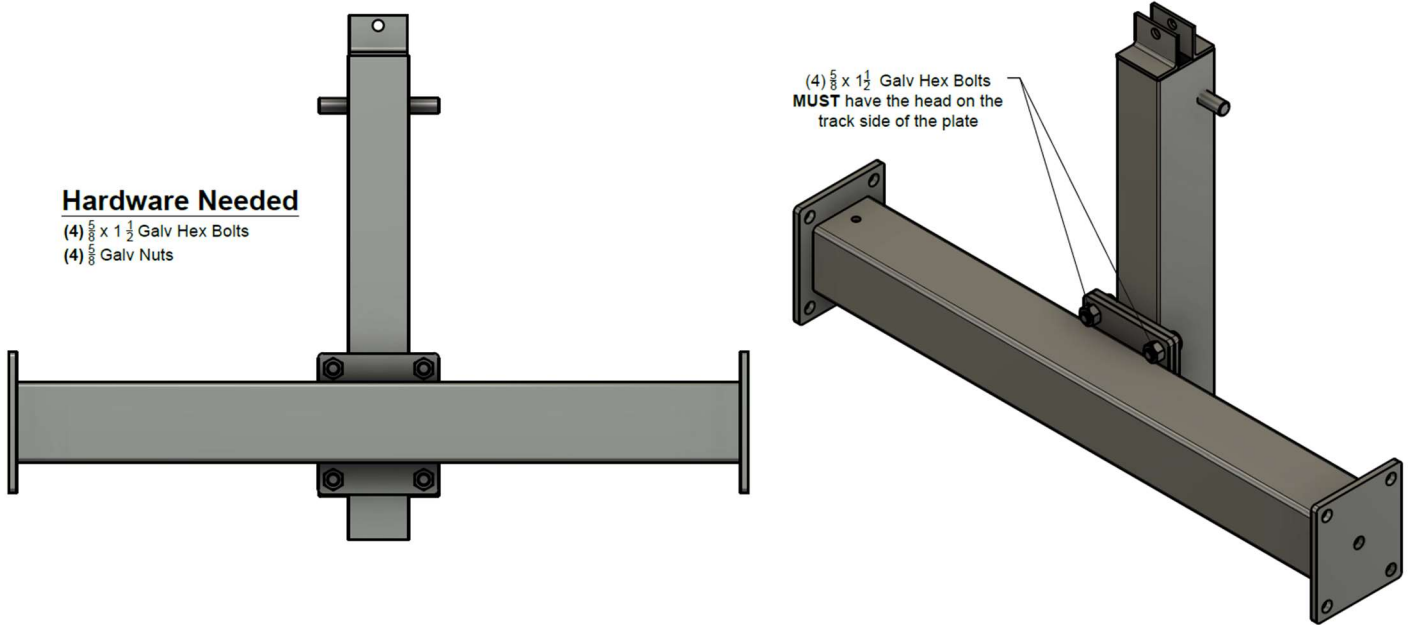

- I. (1) 1500lb Bolted Arm Backbone
- II. (1) 1500lb Bolted Arm Shoulder
- III. (2) 1500lb Arm
- IV. (12) 5/8 x 1 ½ Galv Hex Bolt
- V. (12) 5/8 Galv Nut

*Images are not to scale

****Once you have the track installed and secured,
you are ready to assemble the bolted arm. ****

- 1) Before putting the backbone into the track, you must bolt the backbone and shoulder together.

- 2) Insert the assembled backbone and shoulder into the track from the top so that the tabs for the sheave are facing up.

- 3) Finally, bolt the arms to the shoulder.
